DECLARATION BY MARK P. PITELL
Petition for Reconsideration under 37 C.F.R. § 1.378(e)

Commissioner for Patents
United States Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

I am Mark P. Pitell, the applicant and patentee of and named in the above-identified patent No. 6,352,121.

This is a petition to reconsider the decision mailed 14 March 2011 on the petition filed on 24 January 2011, pursuant to 37 C.F.R. § 1.378(b), to reinstate the above-identified patent in force. The decision dismissed the petition to reinstate the above-identified patent for the reason that the third requirement of Rule 1.378(b) has not been satisfied for two reasons, as presented and responded to under (1) and (2) below:

(1) "First, the record does not contain an enumeration of the steps taken to ensure timely payment of the maintenance fee," and

(2) "Second, the record does not contain a description of the steps taken to file the petition promptly."

RESPONSE TO REASON (1) THAT THE RECORD DOES NOT CONTAIN AN ENUMERATION OF THE STEPS TAKEN TO ENSURE TIMELY PAYMENT OF THE MAINTENANCE FEE:

Reason (1) stated that the meaning of the following sentence, as presented in the petition filed 24 January 2011, was said in the decision mailed 14 March 2011 to be unclear.

"I contacted the U.S. Patent and Trademark Office and found out that my patent was in delinquent status due to my Maintenance Fees at all, which due to Invention

Submission Corporation's patent attorney neglected to inform me of that fact when I paid the patent fees and the maintenance fees in advance."

Several questions were raised in the decision mailed 14 March 2011, specifically:

"What amount did he pay, when was this payment made, and to whom was this money tendered? Did Petitioner tender money to the Invention Submission Corporation, with the understanding that the Invention Submission Corporation would submit this money to the United States Patent Office in order to pay the maintenance fees? If so, which maintenance fees were the Invention Submission Corporation supposed to transmit to the Office, and when?"

RESPONSE AND DISCUSSION

At the time of my initial contact with the Invention Submission Corporation (ISC) in 1999, Linda L. Pitell (the other named applicant and patentee of the above-identified patent No. 6,352,121) and I walked into the ISC office in Riverside, California to meet with ISC's patent attorney with intention to speak with the patent attorney, but were seen by his female representative (a secretary or a legal assistant). I believe that the name of this representative is Bonnie Kulka (see **Exhibit A**).

Among other information, the attorney's representative then provided us with several brochures or pamphlets, at least including those entitled “Services & Fees” (**Exhibit A¹**), “How We Work” (**Exhibit A²**) and “Patent Services” (**Exhibit A³**), and explained the price breakdown and what fees were going to be spent on.

The representative also explained that one part of the fees would go to ISC's patent search book costing approximately \$1000 to ensure that no other patents were the same as the “Snuffer” which is how I identified my invention. ISC's patent search book comprised a bound multi-paged book entitled “Basic Information Package” or “BIP” (for example as identified as such in **Exhibit A¹**) as containing 48 pages of “General Considerations,”

"Production Considerations," "Market Considerations," "Promotional Considerations," a "Summary" and "Bibliography" followed by a "Preliminary Patentability Search Report" prepared by Kaardal & Associates, PC, which is the firm that eventually prepared, filed and prosecuted the patent application which eventuated into patent No. 6,352,121 (see, for example, Exhibit L and Exhibit M).

Further costs would include \$3000 for my patent's registration at USPTO and attorney's fees. I was also told that the remainder of the money would be paid for participation in several upcoming consumer auto shows so that my patent would be shown to automakers, safety engineering specialists and the public in general.

I asked the attorney's representative whether or not I could pay the 3½ years and the 7½ years maintenance fees along with patent's registration, patent search and attorney fees at the same time, which I was told that I could. So I paid all fees for the patent and the maintenance fees in advance. I never received the any documents other than the receipt for the patent search and registration.

To the extent that there is paperwork proving my obligations for payment of the several matters referred to above and payment of these obligations, reference is made to the several exhibits comprising Exhibit C, Exhibit D, Exhibit E, Exhibit G, Exhibit H, Exhibit I, Exhibit J, and Exhibit K. The statements and payments in Exhibit J for Account #374188W appear to be related to the "RETAIL INSTALLMENT CONTRACT AND SECURITY AGREEMENT" shown in Exhibit H; the last statement in Exhibit J shows a "new balance" of \$0.00. The statements and payments in Exhibit K for Account #374213W appear to be related to the "RETAIL INSTALLMENT CONTRACT AND SECURITY AGREEMENT" shown in Exhibit I; the last statement in Exhibit K shows a "new balance" of \$3029.90. While this balance has been paid off, I have not found supporting documents for this.

In 2000, after I received my patent application filing number and the patent search documentation, we moved from my address in Lake Elsinore, CA to Joshua Tree, CA and I have resided there for 12 years now. I was never informed or advised that I would have to contact the USPTO to change my patent filing address. I have received no mailings or further documentation from ISC or from Kaardal & Associates to inform me that my maintenance fees were due because I had been assured by ISC, as stated above, that the maintenance fees were already paid from ISC's patent attorney's documentation that I had in my possession, which clearly stated no maintenance fees were due. Furthermore, I have not ever been contacted by telephone call or received any mailed documentation from ISC to inform me that any maintenance fees had not been paid or were currently due.

With respect to the last date of having been contacted by Kaardal & Associates, to the best of my recollection and paperwork in my possession, the last communication from Ivar M. Kaardal of Kaardal & Associates is in his letter dated March 19, 2002 (Exhibit Q) with which the original copy of my United States Utility Patent Number 6,352,121 was enclosed.

Furthermore, as evidenced in the Declaration and Power of Attorney (Exhibit M), the sole power of attorney was vested in "Ivar M. Kaardal, Registration Number 29,812" and whose correspondence address was given as:

"Kaardal & Associates, PC
Attn: Ivar M. Kaardal
3500 South First Avenue Circle - Suite 250
Sioux Falls SD 57105-5807"

I have since learned, not earlier than March 20, 2011, (see Exhibit R) that "Ivar M. Kaardal ... registration number 29,812, has been excluded on consent from practice before the United States Patent and Trademark Office ... beginning March 1, 2004."

I have since further learned, not earlier than March or April, 2011, (see Exhibit S) that a "Notice of Patent Expiration" was mailed on April 5, 2006 to:

"Kaardal & Associates PC
Attn Ivar M Kaardal
3500 South First Avenue Circle Suite 250
Sioux Falls SD 57105-5807."

I never received such "Notice of Patent Expiration" in 2006 or thereafter. As stated above, I discovered this notice not earlier than March or April, 2011. Inasmuch as Ivar M. Kaardal no longer could practice before the United States Patent and Trademark Office on the mailing date of April 5, 2006, it is not known by me whether this notice was even received by any party at the above Sioux Falls address. Accordingly, I was never provided with the opportunity to rectify the expiration of Patent No. 6,352,121 and pay the maintenance fees therefor.

Offered further in evidence, as shown in Exhibit T, any communications to the law firm of Kaardal & Associates PC could not be made, pursuant to the failure of delivery to that firm of the Decision on Petition mailed March 14, 2011.

No communications from Invention Submission Corporation (ISC), Western Invention Submission Corporation (WISC) or any affiliated business were received by me regarding the payment or lack of payment of any maintenance fees.

In the Decision, the following was stated (omitting the citations):

“Moreover, Petitioner will note that a patent holder's reliance upon an attorney does not provide him with an absolute defense, but rather shifts the focus to whether the attorney acted reasonably and prudently. It is well established that a patent holder is bound by any errors that may have been committed by his attorney. Petitioner will need to establish that any alleged failure of the Invention Submission Corporation could not have been avoided with the exercise of due care. Whether an action by an attorney constituted a breach of the fiduciary duty of care is of no moment to the issue of whether the entire delay was unavoidable.”

A response to the above quoted statement has been made regarding the reasons why I was not made aware of the failed payment of maintenance fees, that is, that I did not receive and was not in a position to receive any communications from Ivar M. Kaardal following his exclusion on consent to practice before the United States Patent and Trademark Office.

Further responses are believed proper regarding my belief and assertion that the fees I paid included the payment of maintenance fees vis-à-vis statements made in some of the papers contained in several of the exhibits.

In the Agreement (Exhibit F) there exist statements regarding the payment of maintenance fees, as follows.

a. In the section entitled “PATENT SERVICES ADDENDUM” and paragraph 3 thereof, the following statement appears:

“3. In addition to the fees paid to WISC in connection with the patent submission services, Client will be responsible for all governmental fees, as defined in the attached outline, and any other related fees which may be required by the Patent and Trademark Office.”

b. The last page entitled "U.S. PATENT AND TRADEMARK OFFICE FEES OUTLINE" states:

"The fees listed below [including 'Maintenance fees'] are paid directly by Client to the U.S. Patent and Trademark Office. These fees are not included in the fees which WISC pays to the patent attorney/patent agent in applying for Client's patent. The patent attorney/patent agent will advise Client when these government fees are due and payable."

In partial response to the immediate above paragraph b, as shown previously, because Ivar M. Kaardal no longer practiced before the United States Patent and Trademark Office as of March 1, 2004, I was never advised when these government maintenance fees were due and payable and, further, I was never provided with the opportunity to rectify the expiration of Patent No. 6,352,121 and to pay the maintenance fees therefor.

In the letter from Ivar M. Kaardal (Exhibit Q) and its possible enclosure (Exhibit Q¹), there appear "INSTRUCTIONS REGARDING PAYMENT OF MAINTENANCE FEES" relating to "the steps you must follow in order to maintain your legal rights for the full patent term" and "MAINTENANCE FEE TRANSMITTAL FORM" relating to this being "the form you will send to the Patent Office when your maintenance fees are due."

Although the Agreement (Exhibit F) dated October 7, 1999 bears my and Linda Pitell's initials and signatures, and in contradistinction to the witnessed statements made therein respecting the payment of maintenance fees, it was and still is my understanding that such fees were included in the fees paid to ISC and WISC. This understanding and state of mind can be found in several of the exhibits.

- a. In Exhibit N in the attachment to the Kaardal & Associates letter dated October 12, 2001 headed by "INSTRUCTIONS FOR ISSUE FEE," there appear within the handwritten notes by me the following "under this number 12-27-2001 all mentains [sic] fees are paid in full 3½ and 7½" and a witnessing by "Cheryl" who I believe was an employee of ISC at the time of her witnessing.
- b. In Exhibit O in the attachment to the Kaardal & Associates letter dated January 2, 2002, "PART B – ISSUE FEE TRANSMITTAL" in my handwriting I wrote "all fee for snuffer [?] were paid in full 3½ and 7½ years," which is to compared with the USPTO-filed "PART B – ISSUE FEE TRANSMITTAL" as shown in Exhibit P.

RESPONSE TO REASON (2) THAT THE RECORD DOES NOT CONTAIN A DESCRIPTION OF THE STEPS
TAKEN TO FILE THE PETITION PROMPTLY:

In answer to this question, the following exhibits are herewith presented and attached hereto.

EXHIBITS

Exhibit U: Copies of notes regarding the monies obtained, in part to cover the costs of filing the petition filed on January 24, 2011, pursuant to 37 C.F.R. § 1.378(b), to reinstate the above-identified patent in force.

Exhibit V: Copy of an investment receipt for an investor not listed in Exhibit U regarding the monies obtained, in part to cover the costs of filing the petition filed on January 24, 2011, pursuant to 37 C.F.R. § 1.378(b), to reinstate the above-identified patent in force.

RESPONSE AND DISCUSSION

Reason (2) stated that "Petitioner has indicated that he learned of the expiration of this patent on June 1, 2010 when he contacted the United States Patent and Trademark Office. Why was this petition not filed until more than seven months had passed?"

The fees required in accompanying the petition were beyond my financial capabilities, and I needed the time to find financial support and to overcome the difficulties relating to finding investors. It was not easy to find these investors; I spoke to or otherwise contacted many people, I think at eight or nine people were willing to invest. Some of my successful efforts are shown in Exhibit U and Exhibit V. In addition, I needed to research as to how I needed to proceed and to fill out the petition.

Further deponent saith not.

All statements made herein of my/our own knowledge are true, all statements made herein on information and belief are believed to be true, and further, that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001, and may jeopardize the validity of the application or any patent issuing thereon.

How We Work

Invention Submission Corporations

The history of innovation stretches from man's first fire...

to the first walk on the moon.

New ideas and products contribute to our lives, as the things we use are constantly changing.

Innovation in a broad sense contributes to the advancement of our society and to our total technology.

Ideas and inventions come from individuals in all walks of life. We believe these individuals – like you – are a great source of creativity.

In fact, it may surprise you to know that twice as many of the greatest inventions of the 20th century came from individuals.

Our company is Invention Submission Corporation, or as we call it, ISC. We work with ideas, innovations and new products.

At ISC our business is to help inventors submit ideas to industry in the hope that companies will give these ideas a good-faith review. This is a difficult procedure, but we do our best for you.

That is why you must sign our Affirmative Disclosure Statement (ADS) before you do business with us.

This form provides you with important information about ISC.

ISC's job is to submit individuals' ideas to industry. Here is how we do this. We code a client's invention so we can submit it to companies who have expressed general interest in a similar field of products.

Let us show you how we would code ice cream as an invention. We assign the appropriate Standard Industrial Classification Code number.

MAJOR GROUPS
Group 20- Food and Kindred Products
Group 21- Tobacco Manufacturers
Group 22- Textile Mill Products
Group 23- Apparel & Other Textile Products
Group 24- Lumber and Wood Products
Group 25- Furniture and Fixtures
Group 26- Paper and Allied Products
Group 27- Printing and Publishing

The process begins with 20 major S.I.C. Codes established by the U.S. Department of Commerce.

S.I.C. Code

MAJOR GROUP 20
Food and Kindred Products

First 2 Digits = MAJOR GROUP

The S.I.C. Code uses successive digits to progressively narrow the classification of a product. The ice cream invention fits into the major food group number 20.

S.I.C. Code

20	Food Products (MAJOR)	
202	Dairy Products (SUB-GROUP)	
2024	Ice Cream & Frozen Desserts (INDUSTRY)	

Four Digits = INDUSTRY

The third digit gives us the sub-group, dairy products. The fourth digit shows us the industry ice cream fits into – ice cream and frozen desserts.

We use S.I.C. Codes to match our clients' inventions with general areas of interest expressed by companies who are in our Data Bank. Our Data Bank is an electronic storage and retrieval system.

Companies register in our Data Bank by writing their areas of interest on the sample form shown. Their interests are then classified by the same codes used for ISC clients' inventions.

Companies registered in ISC's Data Bank™ range in size from small to large Corporations. Most of the registrants are small to medium sized companies.

ISC also maintains another data base of companies who are not registered in ISC's Data Bank™. Using SIC Codes, ISC attempts to match clients' inventions with general areas of interest of these companies.

For each new client using our submission services, we search our Data Bank and data base for matching codes.

ISC packages your invention professionally and prepares a submission brochure.

We attempt to present your idea in a favorable light, using a simple graphic illustration.

Another service we provide is our attempt to publicize our clients' ideas. We do this by sending out press releases to magazines and trade journals.

ISC maintains a data base of publications categorized by product and industry which we attempt to match to your invention.

The publication of press releases is solely at the discretion of the magazines and trade journals. A small percentage of our clients' press releases are published.

Another service we provide our clients is publishing the NEW PRODUCT/INVENTION REGISTER which we distribute to companies. Our clients' inventions are listed in this INVENTION REGISTER by product category.

ISC also offers the additional service of display advertisements in our Concept Catalog.

Both the New Product/Invention Register and Concept Catalog are displayed by ISC at national trade shows and given to companies registering in ISC's Data Bank™.

ISC's efforts include our attendance at trade shows. We do not normally display individual inventions at trade shows. We use professional displays to try to establish new contacts and Data Bank registrations for our company.

Some of the shows ISC attends or our staff has attended in the past are: National Premium Incentive Show, International Housewares Exposition, and National Variety Merchandise Show.

We also sponsor, together with our sister company, INTROMARK INC., our trade show for innovations, called INPEX™. INPEX™ is designed to bring together innovations and marketers in one location.

Inventors with models, prototypes or display materials are also offered the additional service of exhibition space at our INPEX™ shows.

ISC's job is to submit your idea to industry in an effort to obtain a good faith review for your idea and review any interest expressed.

If substantial interest is expressed in your invention, it is assigned to INTROMARK INCORPORATED, our sister company, for follow up.

ISC performs a needed service assisting inventors in packaging and submitting their ideas to industry. We have sales offices in major U.S. cities, which direct your ideas to our headquarters in Pittsburgh—where the work is performed.

The principal purpose of INPEX™, as with our attendance at other trade shows, is to try to establish new contacts and Data Bank registrations for our company.

Patent services are included in ISC's BIP service and patent submission program.

You may choose to apply for a patent and simultaneously submit your idea to industry. This is ISC's patent submission program, our most comprehensive program.

We also offer our Submission Service to inventors with an ongoing inventory.

INVENTION SUBMISSION CORP. and INTROMARK INC. are wholly owned subsidiaries of TECHNOSYSTEMS CONSOLIDATED CORP.

As with other trade shows, we do not normally display individual inventions at INPEX™ as part of our submission services.

ISC will act as your agent and engage a patent attorney or patent agent to prepare and file a U.S. patent application for your invention. You should direct all questions of a legal nature to the patent attorney/patent agent.

Despite our attempts to get some attention for your idea through these methods, you must remember it is an exceptionally difficult thing to do, and your chances of getting good results are extremely small.

Our Client Services Department will assist you by responding to your questions or input. We invite you to visit our corporate headquarters in Pittsburgh and would be pleased to show you our facilities.

Patent Services

DISCOVER WHAT ISC HAS TO OFFER.....

ISC OVERVIEW

Invention Submission Corporation (ISC) is a wholly owned subsidiary of Technosystems Consolidated Corporation. The Technosystems group of companies is America's largest and most experienced provider of invention submission services for patented as well as unpatented ideas since 1985. Our founder and many key employees have been actively employed in the invention service field for 20 years or more.

TWO STAGES

ISC works with inventors in two distinct stages in the process of submitting an invention to industry. In the first stage, invention benefits and relevant information are gathered together in one place, organized and presented in report form in our Basic Information Package (BIP). In the second stage, descriptive materials are prepared and submitted to industry in the hope of obtaining a good faith review.

CONFIDENTIAL SUBMISSION SERVICES

ISC maintains a data bank of over 11,000 companies who have registered their areas of interest with us and agreed to review our clients' ideas in confidence. To our knowledge, this is the only data bank of its type and ISC is the only invention service with the systems and expertise to take steps to attempt to submit ideas in confidence to companies. ISC also has in place a method of submitting inventions to trade publications and other sources without revealing confidential details. While your patent is pending, ISC will take steps to maintain the confidentiality of your idea by ISC's submission methods. These same steps to maintain confidentiality are taken for inventors who do not wish to obtain a patent and/or those who have unpatentable ideas.

U.S. PATENT SERVICES INCLUDED IN ISC SERVICES

Patent services are included in ISC's BIP service and patent submission program. Because large numbers of inventors wish to have patent services, ISC is able to secure patent services for its clients at a reasonable price.

Whitcomb L. Judson was a chubby man who in the late 1800's became tired of the complicated stylish clothes which included layer upon layer of bulky clothes with laces, cords, hooks and buttons. Thus, the first "slide fastener" was created. Together with Colonel Louis Walker, a businessman, the Universal Fastener Company was formed. Not until many years later and with much effort did the idea catch on. On the verge of bankruptcy, the men hired a young engineer by the name of Gideon Sundback. The company changed its name to the Hook & Eye Co. of Hoboken, NJ. Almost 20 years after its invention, the slide fastener took off. It was after B.F. Goodrich introduced a style of rubber boot featuring the hookless slide fastener that an executive from the company first exclaimed that you just "zip'er up or zip'er down" to give the "zipper" its name.

Clarence Crane, a chocolate candy manufacturer from Ohio, developed the Life Savers hard candy to help sales during the summer months. Since his chocolates would melt during shipments to other cities and on the shelves, many candy shops would stop ordering until cooler weather. Ironically, Crane sold his life saver idea and the machine to make them to Edward Noble in 1913 for \$2,900 because, he told Noble, that his business was chocolates-not hard candies! Noble patented the now famous "holed" candies in 1914.

PATENT SEARCHES AND PATENTABILITY OPINIONS

If your idea is unpatented, ISC will obtain a preliminary patentability search and opinion on your behalf. These patent services will be included in your BIP report unless you request that no patent services be performed. ISC will retain a searcher to conduct the preliminary patentability search and a registered patent attorney or agent to provide an opinion of patentability.

SUBMISSION SERVICES

If after receiving the BIP report and the preliminary patentability search and opinion, you decide to submit your invention to companies you will have two choices. If you do not wish to apply for a patent, you may use ISC's submission program. This service is primarily for unpatented inventions. The submission program can also be used by inventors who already have patents.

PATENT SUBMISSION SERVICES

If you wish to apply for a patent and simultaneously submit your idea to industry, you will be offered ISC's patent submission program. In this program ISC will act as your agent and engage a patent attorney or patent agent to prepare and file a U.S. patent application for your invention. You may communicate directly with the patent attorney or patent agent, and should direct all questions of a legal nature to the patent attorney/patent agent. This simultaneous submission and patenting service is called the "patent submission program," and it is ISC's most comprehensive service.

PATENT APPLICATION PENDING

Should you proceed with our patent submission program, once the patent application has been filed on your behalf, we will mark your submission materials with the designation "patent pending". It can take 18 months or more to prosecute a utility patent application and 36 months or more for a design patent application (see back page of this brochure for an explanation of the difference in patent types). During that time ISC will proceed with its efforts of preparing materials and attempting to submit your idea to industry on a confidential basis. Please understand that there is no guarantee that a patent will issue and an application can be denied at any time during this period. While waiting for a final determination of patentability to be rendered by the U.S. Patent Trademark Office, you will receive all of ISC's submission program services.

Levi Strauss was a 19 year old cloth peddler when he decided to head for San Francisco and try his luck during the California gold rush. On the clipper ship from New York to California he sold what cloth he had left except for a few rolls of canvas. When he reached California, the rugged miners complained that they needed more pants as the cloth pants they wore didn't last very long. Levi hired a local tailor to cut and sew his canvas into pants. The rest is history! (The canvas was later replaced by a more durable material from France called serge de nimes, now known as denim and patented in 1901.)

The Band-Aid was invented in 1900 when Earl Dickenson attempted to create a bandage that his accident-prone wife could apply herself when he was not home. The original Band-Aid was a strip of surgical tape with a gauze square placed in the center and then covered for later use by a satin-like fabric called Crinoline which kept the glue on the tape from drying out. Mr. Dickenson was greatly rewarded for his invention by his employer, Johnson & Johnson and retired in 1957 as a vice president for the company! The bandage was patented by Johnson & Johnson soon after its invention but the "Band-Aid" brand name/trademark wasn't applied until 1920.

What is a patent?

A patent for an invention is a grant of a property right by the Government to the inventor (or heirs or assigns), acting through the U.S. Patent and Trademark Office. The duration of the grant of a utility patent is 20 years from the date of filing the application with the U.S. Patent and Trademark Office, subject to the payment of maintenance fees. A design patent has a term of 14 years and no fees are necessary to maintain a design patent in force. The right given by the patent grant—both utility and design—extends throughout the United States and its territories and possessions.

What is the difference between a design patent & a utility patent?

It is important to understand the difference between a utility patent and a design patent. A utility patent protects a new and useful process, machine, item of manufacture or composition of matter, or any new and useful improvement thereof; and a design patent protects any new, original and ornamental design for an article of manufacture, and not its structure or utilitarian features. In a simplified sense, a utility patent on a product protects the function or structure of an invention or what it does, while a design patent protects the way it looks.

The right granted by the patent is, in the language of the statute, "the right to exclude others from making, using or selling" the invention. What is granted is not the right to make, using or selling" the invention. What is granted is not the right to make, use or sell, but the right to exclude others from making, using or selling the invention.

If you wish patent advice, it is advisable that you seek such advice from an independent patent attorney

referred to as Snufflee; and

Whereas, WISC is engaged in the business of assisting and aiding inventors in submitting inventions,
products or ideas to industry in an attempt to obtain a good faith review and reviewing any interest which may
be expressed.

In consideration of the mutual promises and undertakings contained herein, and other good and valuable
considerations, it is mutually agreed as follows:

1. To secure the services and considerations furnished by WISC, as outlined in this Agreement, the
Client agrees to pay the sum of \$ 9250 in advance to WISC. This amount shall be considered
full and complete payment for the following:

- A) Initial contact with companies, including manufacturers, marketers, distributors, retailers, sales representatives with whom we make contact and/or who contact us through our business associations, mailings, publicity, advertising, and attendance at trade shows or business seminars. WISC contacts are made on behalf of WISC generally, and not on behalf of any particular invention. WISC seeks to have companies register their preliminary product interest areas in the ISC DATA BANK™. Companies who register request that WISC submit client ideas to them on a confidential basis.
- B) Preparation of a New Product Submission Brochure, which shall include a description of the invention, design advantages and features, a graphic or other illustration, SIC code and suggested distribution channels.
- C) WISC will use Standard Industrial Classification coding for the purpose of attempting to match Client's idea, invention or product with companies who may have registered preliminary product interest areas in the ISC DATA BANK™. Such companies who have registered a preliminary product interest area which matches the SIC code assigned to Client's invention will receive a copy of Client's New Product Submission Brochure in the hope that it will receive a good faith review.
- D) WISC will prepare a publicity release announcing the availability of the Client's idea, invention or product but not disclosing its working details, and send said release to magazines or trade publications it deems suitable, which trade magazines or publications, may, if they choose, publish said release.

- E) ISC maintains a data base of companies in various industries who, unlike registrants in the ISC DATA BANK[™], have not registered preliminary product interest areas with ISC and have not requested ISC's submissions in confidence. ISC attempts to match Client's invention with general areas of interest of these companies. Such companies whose general areas of interest match the SIC code assigned to Client's invention will receive a copy of Client's publicity release which does not reveal the working details of Client's invention, in the hope they will show interest in Client's idea and agree to receive Client's New Product Submission Brochure in confidence.
- F) WISC will submit drafts of descriptive material to Client for approval and/or revision suggestions prior to printing.
- G) WISC will list a brief description of Client's invention in a future issue of its NEW PRODUCT/INVENTION REGISTER which WISC publishes annually. Companies registering in the ISC DATA BANK[™] will receive the most current edition of the NEW PRODUCT/INVENTION REGISTER.
- H) If a company to whom a New Product Submission Brochure has been submitted shows additional interest, WISC may also, at its discretion, perform additional services, either independently or through outside resources. WISC may also at its discretion, prepare or have prepared with the involvement of Client, additional design information, graphics or other materials. It is understood that WISC is not required to provide any of the services enumerated in this subparagraph, but may do so if in its sole discretion such services may be useful in attempting to generate additional interest once preliminary interest has been expressed by a company or companies.
- I) If after substantial interest has been expressed, and Client wishes to attempt to license or sell said idea, invention or product, then WESTERN INVENTION SUBMISSION CORPORATION, which does not license or sell ideas, inventions or products, shall submit any inquiries, contacts or interest expressed in Client's product to INTROMARK INC., a Pennsylvania corporation, which has agreed to represent and attempt to license and/or sell said idea, invention or product in accordance with the terms of the INTROMARK PROPOSAL which is attached hereto.
2. This Agreement shall remain in effect for a period of twenty-four (24) months from the date of this Agreement; during which time Client agrees that WISC shall have the exclusive right to submit the new idea, invention or product, which is the subject of this Agreement, for the sole purpose of reviewing interest including the right to use designs, models, patents issued and pending, copyrights, trademarks, promotional literature, and any and all other materials relating thereto now in the possession of Client or which may hereafter be developed by Client or WISC.
3. WISC shall be under no obligation whatsoever to provide any services to Client until the payment set forth in Paragraph 1 hereof shall have been received in full by WISC.
4. Client shall not be obligated for any costs of WISC administrative, telephone, postage, office expense, secretarial services or other expenses incidental to its submission of Client's idea.

Whereas, INTROMARK understands that WESTERN INVENTION SUBMISSION CORPORATION (WISC) submits ideas, inventions and products to industry in an attempt to obtain a good faith review, and that some of these may generate substantial interest such that it will be useful to attempt to market and to license them; and WISC does not market or sell inventions; and

Whereas, INTROMARK has agreed with WISC that it will not charge a fee to WISC clients, but will receive a percentage of the proceeds of sale if any, of said invention, idea or product.

INTROMARK shall submit any contract involving the invention to Client before executing on Client's behalf, and Client shall have the right to accept or to reject any such contract negotiated on his or her behalf before it has been executed by INTROMARK.

- FULL PATENT PROTECTION PROVIDES LEGAL PROTECTION FOR IDEAS AND INVENTIONS. WE GIVE NO ADVICE AS TO WHETHER YOUR IDEA IS PATENT-ABLE. SUCH ADVICE MAY COME ONLY FROM A PATENT ATTORNEY OR LICENSED PATENT AGENT.
- YOU SHOULD TREAT YOUR IDEA AS A CONFIDENTIAL SUBJECT IN ORDER TO AVOID LOSING ANY PATENT RIGHTS YOU MAY HAVE.
- IF YOU WISH PATENT ADVICE, IT IS ADVISABLE THAT YOU SEEK ADVICE FROM AN INDEPENDENT PATENT ATTORNEY.

NOTICE OF CANCELLATION

5. Pursuant to the terms of this Agreement, INTROMARK will attempt to market Client's idea, invention or product. If a licensing agreement results, then in such case INTROMARK shall receive twenty percent (20%) of all royalties paid; or, if an outright sale results, INTROMARK shall receive twenty percent (20%) of the total sales price paid. In the event that any contacts made by INTROMARK or WISC or introduced to Client by INTROMARK or WISC during the term of this Agreement or renewal leads to royalties or a sale for Client, INTROMARK shall be compensated as stated above, even if the royalties are earned or the sale is made after the termination of this Agreement for any reason whatsoever. INTROMARK, however, shall not be entitled to any compensation if the licensee or purchaser shall be discovered or located solely by the effort of Client after the termination of this Contract or its renewal. Under no circumstances shall INTROMARK be entitled to any compensation or fee from Client other than as set forth in this paragraph.

PATENT SERVICES ADDENDUM

The terms of this Addendum are hereby incorporated into the attached Submission Agreement. Whereas, Client wishes to have a patent application filed for Client's idea, invention or product pursuant to the patentability opinion letter dated Sept 15 1999, and at the same time have said idea, invention or product submitted to Industry in the hope of obtaining a good faith review.

In consideration of the mutual promises and undertakings contained herein, it is mutually agreed as follows:

1. The patent services outlined in this Addendum will not begin until Client has paid a minimum of \$3,000 (U.S.) to WISC. If Client is applying for a utility patent, the first \$1,850 will be used for payment to WISC to begin its submission services. The next \$1,150 of this fee will be the fee for patent services held in a non-interest bearing escrow account for the benefit of and for periodic payment to a patent attorney/patent agent for professional patent attorney fees and drafting services. If Client is applying for a design patent, the first \$2,050 will be used for payment to WISC to begin its services. The next \$950 of this fee will be the fee for patent services held in a non-interest bearing escrow account for the benefit of and for periodic payment to patent attorney/patent agent for professional patent attorney fees and drafting services. These escrowed fees include all patent attorney/patent agent services involved in the preparation and prosecution of a utility or design application until a final determination of patentability is rendered by the Patent & Trademark Office.
2. Client understands that WISC does not receive a fee or commission from the patent attorney/patent agent. The attorney so engaged shall at all times be the attorney for and responsible to the Client.
3. In addition to the fees paid to WISC in connection with the patent submission services, Client will be responsible for all governmental fees, as defined in the attached outline, and any other related fees which may be required by the Patent and Trademark Office.
4. WISC is appointed Client's agent with full power and authority to engage for Client a patent attorney/patent agent to prepare and file in Client's name a utility and/or design patent application on Client's idea, invention or product.
5. WISC agrees to assist Client's so engaged patent attorney/patent agent by receiving necessary communications and information from Client and delivering any necessary documentation to the patent attorney/patent agent. Client should direct all questions of a legal nature to the patent attorney/patent agent.
6. Client understands that the fact that a patent attorney has determined Client's invention may be patentable does not mean it is marketable, and such determination should not be the basis upon which Client proceeds with WISC's submission program.
7. Client understands that neither WISC nor the patent attorney/patent agent can promise or guarantee that the U.S. Patent and Trademark Office will issue a patent to Client, and a patent can be denied at any time during the pendency period.

©Nov. 1998 WISC

8. Client understands that frequently an idea, invention or product submitted by Client is basic in functional concept and/or design, and may require additional description, illustration, modification and/or refinement for proper presentation in a patent application filed in the U.S. Patent and Trademark Office. Client agrees to provide WISC with any requested and/or required information, if available, necessary to refine, modify, better illustrate or better describe Client's idea, invention or product.

9. Client understands that WISC cannot and does not participate in the legal activity associated with the seeking of patent protection and cannot guarantee the extent and/or scope of protection offered by any patent which may eventually be obtained for Client by Client's patent attorney/patent agent.

10. Client understands the difference between a utility patent and a design patent. A utility patent protects a new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, and a design patent protects any new, original and ornamental design for an article of manufacture. In a simplified sense, a utility patent on a product protects the function or structure of an invention or what it does, while a design patent protects the way it looks. Client understands this difference and indicates below this understanding by initialing the appropriate box below that the following type of patent application will be prepared and filed by a registered patent attorney/patent agent on his/her behalf:

<input checked="" type="checkbox"/> I understand that a Utility Patent Application will be filed on my behalf <u>MP LP</u> Client Initials	<input type="checkbox"/> I understand that a Design Patent Application will be filed on my behalf _____ Client Initials
--	---

11. Once the patent application has been filed on Client's behalf, WISC will mark your submission materials with the designation "patent pending." During that time, WISC will proceed with its efforts of preparing and attempting to submit Client's idea to industry on a confidential basis.

UNIVERSAL FINANCE COMPANY, INC.

*Welcome to Universal Finance Company;
we are glad to have you as a customer!*

We recently purchased your Retail Installment Contract from Invention Submission Corporation and have enclosed the executed copy for your records. We now wish to introduce you to our services and point out one very important benefit to you.

The box in the middle of the agreement provides you with information concerning your payments. It includes the number of payments you are to make, the amount of each installment and the date each payment is due in our office. **Please pay special attention to the first due date.** We are sure you want to get started on the right foot, and the best way to do that is to get in the habit of making your payments in a timely manner. To make it easy for you, we will send you a bill each month as a reminder.

We also want to explain the **Same As Cash Option**. Depending on the length of time of your contract with ISC, you have either 30 or 180 days in which to pay the cash price of your contract without any finance charges whatsoever. Even those finance charges which you pay in your regular monthly payments will be refunded to you if you pay in full within 30 or 180 days. This is quite a good credit deal for you if you are able to borrow the contract price at an interest rate lower than ours. ISC will still pay us a service handling fee, but you can save the difference. You may be able to use your credit union, an insurance policy or a home equity loan for this purpose.

Of course, this does not mean that you are excused from making payments during the first 30 or 180 days of your contract. We are giving you this friendly tip to provide you with the opportunity to save as much of the finance charges on your account as you possibly can.

If you have any questions at all about how to make this savings or any matter in your contract, please call us at 1-800-766-1110 and we will be happy to help you. We look forward to a pleasant relationship and thank you in advance for your prompt payment.

Sincerely,

UNIVERSAL FINANCE COMPANY, INC.

*Welcome to Universal Finance Company;
we are glad to have you as a customer!*

We recently purchased your Retail Installment Contract from Invention Submission Corporation and have enclosed the executed copy for your records. We now wish to introduce you to our services and point out one very important benefit to you.

The box in the middle of the agreement provides you with information concerning your payments. It includes the number of payments you are to make, the amount of each installment and the date each payment is due in our office. **Please pay special attention to the first due date.** We are sure you want to get started on the right foot, and the best way to do that is to get in the habit of making your payments in a timely manner. To make it easy for you, we will send you a bill each month as a reminder.

We also want to explain the **Same As Cash Option**. Depending on the length of time of your contract with ISC, you have either 30 or 180 days in which to pay the cash price of your contract without any finance charges whatsoever. Even those finance charges which you pay in your regular monthly payments will be refunded to you if you pay in full within 30 or 180 days. This is quite a good credit deal for you if you are able to borrow the contract price at an interest rate lower than ours. ISC will still pay us a service handling fee, but you can save the difference. You may be able to use your credit union, an insurance policy or a home equity loan for this purpose.

Of course, this does not mean that you are excused from making payments during the first 30 or 180 days of your contract. We are giving you this friendly tip to provide you with the opportunity to save as much of the finance charges on your account as you possibly can.

If you have any questions at all about how to make this savings or any matter in your contract, please call us at 1-800-766-1110 and we will be happy to help you. We look forward to a pleasant relationship and thank you in advance for your prompt payment.

Sincerely,

Doug Raynor,

If any unique or distinctive element, detail or feature is not represented, or if you feel that any unique or distinctive element, detail or feature is not completely or fully represented, we need to know of any corrections or changes as soon as possible. Please do not assume that any changes that you have sent to Invention Submission Corporation or its representatives have automatically reached our firm, as the enclosed drawings in most cases are based upon the latest information that we have received. If these drawings are incorrect, you are responsible for telling us of the changes or additions that are necessary.

Enclosed with this letter is an acknowledgement slip with an additional set of copies of Exhibits A and B attached to the approval slip. **You must return the Acknowledgement slip with the copies of the Exhibits to our office before we will begin the preparation of your patent application.**

If the information in both Exhibits A and B are correct, please sign and date the acknowledgement slip below and return it with the attached copies of Exhibit A and B to our office within 21 days from the date of this letter in the enclosed envelope. (Note: Your approval must be received in writing--we cannot accept approvals by phone.)

However, if you have changes that need to be made to the data or drawings, please send as much information about the changes, additions or deletions to us within 21 days from the date of this letter. Changes in the data or drawings are most effectively communicated to us by making the changes in red or blue ink **directly** on the copies of Exhibits A and B attached to the acknowledgement slip, and then mailing or faxing them to us at the above location **with your file number clearly marked** on any communication to our office. If you decide to fax corrected drawings to our office, please make sure that the markings are dark and clear or the fax we receive may not be understandable.

It is VERY IMPORTANT that you do not delay in responding to this letter. Any delay on your part in responding to this request can only delay the preparation of your application. **If you do not promptly notify us within 21 days of the date of this letter, we may begin preparing your application using the above data and drawings.** If the above data or drawings are incorrect, and you have failed to notify us of the needed changes in the data or drawings within the 21 day period, **additional fees for attorney time and/or drawing revisions may be required** to complete any changes, additions or other revisions in the application that has been prepared based upon the incorrect data or drawings. If you respond promptly to this letter, you can avoid additional fees.

If you are **not able to reply** with all the information on the needed changes within 21 days from the date of this letter, please contact our office within the 21 day period and let us know that the preparation of the application should not begin until you are able to supply us with the needed information. This timely notification will help avoid the incurring of additional fees for revising your application.

Thank you again for allowing us to assist you in prosecuting your patent application. We are excited to be working with you.

Respectfully yours,

Disclosure of the true inventors of an invention described in a patent application is very important. Inventorship is a complicated issue that is ultimately determined by the contributions of individual persons to the subject matter of the claims in the patent application. Inventors are usually persons who make an intellectual contribution to the

conception of the invention. Typically, an inventor of an invention is NOT:

- 1) a person who merely suggests a desirable result for an invention (without knowing a way of accomplishing that result),
- 2) a person whose contribution to the invention was merely following the directions of another person, or
- 3) a person whose only contribution to the invention was monetary or moral or emotional support to the inventors.

IMPORTANT: If a patent application issues as a patent with the inventors **INCORRECTLY** identified, the patent will most likely be held **INVALID** for incorrect inventorship. Therefore, it is extremely important that all persons who qualify as inventors are named as inventors in the patent application, and it is equally important that no persons are named in the application who do not qualify as inventors.

Please do not confuse “**inventorship**” of an invention with “**ownership**” of the invention (or ownership of a patent application for that invention). If a person is not an inventor as defined by the law, you cannot transfer ownership to a non-inventor by listing the non-inventor as an inventor of the invention. Further, a patent application cannot be used to create a partnership or other legal relationship between inventors and other “non-inventors”. Ownership of the invention and the patent application are controlled by a separate agreement called an “assignment”. For an additional fee, we can prepare an assignment document for you.

Please contact our office if you have any questions as to the inventorship of your invention.

In re: NOTICE OF ALLOWANCE-UTILITY PATENT APPLICATION
Title: VEHICLE FIRE EXTINGUISHER SYSTEM
Serial Number: 09/663,171
Docket Number: RDE213
Law Firm Number: K&A 99-1870

Dear Mark and Linda:

Congratulations!! It is our pleasure to inform you that the U.S. Patent and Trademark Office (U.S.P.T.O.) has indicated that it will allow your patent application to issue as a patent. Enclosed is a copy of the Notice of Allowance and Issue Fee Due. The U.S.P.T.O. requires that you pay an "Issue Fee" before your application will issue as a patent. The \$640.00 issue fee must be received by the U.S.P.T.O. on, or before, January 4, 2002, the date indicated on the enclosed correspondence from the U.S.P.T.O.

To expedite this process, please send your Issue Fee payment money order as soon as possible so that we can prepare the necessary documents and forward them along with your payment money order to the U.S.P.T.O. The money order should be made payable to "Assistant Commissioner for Patents" and should be mailed to Kaardal & Associates at the following address:

Kaardal & Associates
3500 South First Ave. Circle- Suite 250
Sioux Falls, SD 57105

We cannot be responsible for the timely filing of payment money orders which are mailed less than two weeks before the 1/4/02 due date.

It is to your advantage not to wait. Failure to make this payment by the due date will result in abandonment of the application. If you miss the issue fee deadline, the cost for reviving your patent application would be \$640.00 (U.S.P.T.O. Revival Fee) and \$640.00 (U.S.P.T.O. Issue Fee), plus \$159.00 in attorneys' fees for preparing the petition for reviving your patent application.

Exhibit "N"

Please check the "Declaration and Power of Attorney" at the end of your copy of the patent application that was filed on 9/15/00. The address that appears in that "Declaration" is the address that will be printed on the front of the Official Patent Grant document. If your address has changed, or you want a different address on the patent than was printed in the "Declaration and Power of Attorney," please notify us as soon as possible so that notification of this change can be submitted to the U.S.P.T.O. with the Issue Fee payment for your application. **Even if you have previously notified our office of an address change for you, we do not automatically notify the U.S.P.T.O. of an address change unless you expressly instruct us to do so.**

The U.S. Patent and Trademark Office ("U.S.P.T.O") has announced that the government Issue Fees submitted to the U.S.P.T.O on or after October 1, 2001 will be increased. This increase in the utility patent issue fee is from \$620.00 to **\$640.00**. This increase applies to any issue fee paid on or after October 1, 2001, regardless of the fee amount that is indicated on the U.S.P.T.O forms.

Thank you for allowing us to assist you with your patent application. If I may be of further service, please so advise.

Respectfully Yours,

INSTRUCTIONS REGARDING PAYMENT OF MAINTENANCE FEES

1ST Fee becomes due 3 years from the issue date on your patent

The utility patent you have just received gives you, the inventor, the legal right to prevent others from making, using, and selling your invention, as defined by the claim(s) of the patent, for the term of your patent.

If you wish to maintain these legal patent rights for the full potential time period, maintenance fees must be paid under the law to the UNITED STATES PATENT AND TRADEMARK OFFICE for the protection during the periods indicated below.

Fee Code	Maintenance Fee Amount	Payment	Explanation
283	\$ 440.00	4 (4-8 years)	This is your first maintenance fee. The fee is due to the Patent Office between 3 years and 3 years 6 months from the issue date on your patent to avoid payment of surcharges.
284	\$ 1,010.00	8 (8-12 years)	This is your second maintenance fee. The fee is due to the Patent Office between 7 years and 7 years 6 months from the issue date on your patent to avoid payment of surcharges.
285	\$1550.00	12	This is your final maintenance fee. The fee is due to the Patent Office between 11 years and 11 years 6 months from the issue date on your patent to avoid payment of surcharges.
286	\$ 65.00	This is a <u>surcharge</u> that is due if the maintenance fees are NOT paid within the six months grace period. For example, if you pay your first maintenance fee after the 3 years and 6 month period, you must include a \$65.00 surcharge. If, after the grace period is up, and you have not paid the maintenance fee and surcharge, your patent will be considered abandoned.	

These fees are based on your status as a "Small Entity". Maintenance fees for large businesses are twice these quoted above. There is a six month "grace period" (the six months immediately

subject to an additional \$65.00 surcharge (Fee Code 286), as specified earlier in these instructions.

You must immediately fill out and return the enclosed **ADDRESS INDICATION FORM** to the **UNITED STATES PATENT AND TRADEMARK OFFICE** at the address listed on the form. You should make additional copies of the form and send a new form with your new address to the Patent Office if you move in the future.

The Patent Office will not send a reminder notice until the "grace period" has begun. To avoid paying the surcharge, you must keep a record of when your fees will be due. The notice provided by the Patent Office is merely a courtesy and intended to aid patentees. These notices, errors in these notices, or the lack of notices, will in no way shift the burden of monitoring the time for paying maintenance fees on patents from the Inventor to the Patent Office.

**** THIS IS YOUR RESPONSIBILITY ****

Each of the three maintenance fees must be submitted with the enclosed **MAINTENANCE FEE TRANSMITTAL FORM**. Therefore, you should make extra copies of this form for future use. The form must be completed with all the information in row 1 completed. Rows 2-8 are intended for use in simultaneously paying maintenance fees for several patents and will not apply directly to you. The requested information in columns 1-9 are explained on a separate sheet under the heading **EXPLANATION OF INFORMATION REQUESTED**. The filing date, serial number, patent date, and patent number appear on the face of your patent. Item 9 should be completed as "YES" to indicate your Small Entity status.

THE PAYMENT OF THE MAINTENANCE FEES IS YOUR RESPONSIBILITY. FAILURE TO TIMELY PAY THESE FEES WILL RESULT IN THE PREMATURE EXPIRATION OF YOUR PATENT.

The Patent Office may change these fees by law or regulation from time to time. The fees listed merely indicate those currently applicable. The current maintenance fee schedule is published in 37 Code of Federal Regulations, Section 1.20 and information on maintenance fees may be obtained by inquiry to the Patent Office, or any local patent attorney or agent.

OFFICE OF PETITIONS

In re Application of :
Pitell et al. :
Application No. 09/663,171 :
Patent No. 6,352,121 : DECISION ON PETITION
Filed: September 15, 2000 : PURSUANT TO 37 C.F.R.
Issue Date: March 5, 2002 : § 1.378(B)
Attorney Docket No. 99-1870 :
Title: VEHICLE FIRE :
EXTINGUISHER SYSTEM :

This is a decision on the petition filed on January 24, 2011, pursuant to 37 C.F.R. § 1.378(b) to reinstate the above-identified patent.

This petition pursuant to 37 C.F.R. § 1.378(b) is DISMISSED.

Background

The patent issued on March 5, 2002. The grace period for paying the 3½-year maintenance fee provided in 37 C.F.R. § 1.362(e) expired at midnight on March 5, 2006, with no payment received. Accordingly, the patent expired on March 5, 2006 at midnight.

Any petition to accept an unavoidably delayed payment of a maintenance fee filed under 37 C.F.R. § 1.378(b) must include:

- (1) the required maintenance fee set forth in 37 C.F.R. § 1.20 (e) through (g);
- (2) the surcharge set forth in 37 C.F.R. § 1.20(i)(1), and;
- (3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be

paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent - the showing must enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly.

Both the surcharge associated with a petition to accept the late payment of a maintenance fee as unavoidable and the 3½ and 7½-year maintenance fees were submitted on January 24, 2011, along with a one-paragraph statement of facts. Petitioner has also included an overpayment in the amount of \$70. This \$70 will be refunded via the issuance of a Treasury Check in due course.

The first and second requirements of Rule 1.378(b) have been satisfied. The third requirement of Rule 1.378(b) has not been satisfied, as will be discussed below.

The standard

35 U.S.C. § 41(c)(1) states, *in pertinent part*:

The Director may accept the payment of any maintenance fee... after the six-month grace period if the delay¹ is shown to the satisfaction of the Director to have been unavoidable.

37 C.F.R. § 1.378(b)(3) is at issue in this case. Acceptance of a late maintenance fee under the unavoidable delay standard is considered under the same standard for reviving an abandoned application under 37 C.F.R. § 1.137(a). This is a very stringent standard. Decisions on reviving abandoned applications on the basis of "unavoidable" delay have adopted the reasonably prudent person standard in determining if the delay was unavoidable:

The word 'unavoidable' ... is applicable to ordinary human affairs, and requires no more or greater care or diligence than is generally used and observed by prudent and careful men in relation to their most important business.²

¹ This delay includes the entire period between the due date for the fee and the filing of a grantable petition pursuant to 37 C.F.R. § 1.378(b).

² *In re Mattullath*, 38 App. D.C. 497, 514-15 (1912) (quoting *Ex parte Pratt*, 1887 Dec. Comm'r Pat. 31, 32-33 (1887)); see also *Winkler v. Ladd*, 221 F. Supp. 550, 552, 138 U.S.P.Q. 666, 167-68 (D.D.C. 1963), *aff'd*, 143 U.S.P.Q. 172 (D.C. Cir. 1963); *Ex parte Henrich*, 1913 Dec. Comm'r Pat. 139, 141 (1913).

In addition, decisions are made on a "case-by-case basis, taking all the facts and circumstances into account." Nonetheless, a petition cannot be granted where a petitioner has failed to meet his or her burden of establishing that the delay was "unavoidable."³

The burden of showing the cause of the delay is on the person seeking to revive the application.⁴

**Application of the standard to the current facts and
circumstances**

Petitioner has explained that on June 1, 2010, he learned that this patent has expired for failure to submit the 3-½ year maintenance fee, and has alleged that he "paid the patent fees and the maintenance fees in advance," and that the "Invention Submission Corporation's patent attorney" failed to tell him that the patent was expired when he paid said fees.

The period for paying the 3½-year maintenance fee without the surcharge extended from March 5, 2005 to September 4, 2005 and for paying with the surcharge from September 5, 2005 to March 5, 2006. Thus, the delay in paying the 7½-year maintenance fee extended from March 5, 2006 at midnight to the filing of this petition on January 24, 2011.

Patentee has provided an indication of the manner in which he became aware of the expiration of the patent.

The record does not contain a showing that the delay was unavoidable, as will now be pointed out.

First, the record does not contain an enumeration of the steps taken to ensure timely payment of the maintenance fee. An adequate showing that the delay in payment of the maintenance fees at issue was "unavoidable" within the meaning of 35 U.S.C. 41(c) and 37 CFR 1.378(b)(3) requires a showing of the steps taken to ensure the timely payment of the maintenance fees for this patent. Where the record fails to disclose that the patentee took reasonable steps to ensure timely payment of the maintenance fees, 35 U.S.C. § 41(c) and 37 C.F.R. § 1.378(b)(3)

³ Haines v. Quigg, 673 F. Supp. at 316-17, 5 U.S.P.Q.2d at 1131-32.

⁴ Id.

preclude acceptance of the delayed payment of the maintenance fee under 37 CFR § 1.378(b).

The record is not clear on why these maintenance fees were not submitted to the Office. Petitioner has alleged that he paid the maintenance fees in advance. Petitioner has indicated:

"I contacted the U.S. Patent and Trademark Office and found out that my patent was in delinquent status due to my Maintenance Fees at all, which due to Invention Submission Corporation's patent attorney neglected to inform me of that fact when I paid the patent fees and the maintenance fees in advance."

The meaning of this sentence is unclear. What amount did he pay, when was this payment made, and to whom was this money tendered? Did Petitioner tender money to the Invention Submission Corporation, with the understanding that the Invention Submission Corporation would submit this money to the United States Patent Office in order to pay the maintenance fees? If so, which maintenance fees were the Invention Submission Corporation supposed to transmit to the Office, and when? Petitioner would be well advised to provide documentation which would substantiate any assertion that the Invention Submission Corporation was obligated to submit the 3½ and 7½ year maintenance fees on his behalf.

Moreover, Petitioner will note that a patent holder's reliance upon an attorney does not provide him with an absolute defense, but rather shifts the focus to whether the attorney acted reasonably and prudently.⁵ It is well established that a patent holder is bound by any errors that may have been committed by his attorney.⁶ Petitioner will need to establish that any alleged failure of the Invention Submission Corporation could not have been avoided with the exercise of due care. Whether an action by an attorney constituted a breach of the fiduciary duty of care is of no moment to the issue of whether the entire delay was unavoidable.⁷

⁵ California Medical Products v. Technol Med. Prod., 921 F. Supp. 1219, 1259 (D. Del. 1995).

⁶ Smith v. Diamond, 209 U.S.P.Q. 1091, 1093 (D.D.C. 1981)(citing Link v. Wabash Railroad Co., 370 U.S. 626, 8 L. Ed. 2d 734 (1962)).

⁷ See Haines v. Quigg, 5 USPQ2d 1130 (N.D. Ind. 1987)(the court, in affirming an Office decision denying revival of an application on the basis of unavoidable delay, stated: "If the attorney somehow breached his duty of care to plaintiff, then plaintiff may have certain other remedies available to him against his attorney. He cannot, however, ask the court to overlook [attorney's] action or inaction with regard to the patent application.")

Second, the record does not contain a description of the steps taken to file the petition promptly. Petitioner has indicated that he learned of the expiration of this patent on June 1, 2010 when he contacted the United States Patent and Trademark Office. Why was this petition not filed until more than seven months had passed?

Conclusion

Any request for reconsideration of this decision must be filed within **TWO MONTHS** of the mailing date of this decision. Any such petition for reconsideration must be accompanied by the \$400 petition fee set forth in 37 C.F.R. § 1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. Accordingly, on request for reconsideration, it is extremely important that Petitioner supply any and all relevant information and documentation in order to meet his burden of showing unavoidable delay. This includes statements by all persons with direct knowledge of the cause of the delay, setting forth the facts as they know them. Petitioner must provide documentation and address the deficiencies noted above. If on request for reconsideration, the delayed payment of the maintenance fees is not accepted, then the maintenance fees are subject to refund following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed.

The reply should include a cover letter entitled "Renewed Petition pursuant to 37 C.F.R. § 1.378(e)". This is not a final agency action within the meaning of 5 U.S.C § 704.
